

#MAKEAMOVEFORWATER

Thousands of people die every year from diseases caused by unsafe drinking water, lack of sanitation and insufficient water for hygiene. 2 billion people lack clean accessible water. Together we can help! Make a Move for Water is a global call to action to raise awareness and funds for communities around the world who lack access to clean water and sanitation. During the month of March (in honor of World Water Day March 22), groups worldwide will make a move around their workplace, in their community, at their school, or in their neighborhood to help provide and protect clean water worldwide.

Ideas to make a move: Pick up trash along a waterway, help raise awareness by sharing information on social media, help plant trees, help organize a walk to recognize the long walk people are making daily for water, save water at your workplace or home, help educate kids on the water crisis..many ways to make a move! Make your pledge for action and register today at www.cleaninternational.org.
